

Alessandro Gorla

Mechanical Engineer

Robotics and Mechatronics Engineer with a strong theoretical background and hands-on experience in robotics, automation, and mechanical engineering. My master's thesis focused on human-robot collaboration, proposing a vision-based trajectory prediction framework that combines human pose estimation with a Diffusion policy generative model to enable more intuitive and proactive robot behaviour during collaborative manipulation tasks. Through this work, I gained experience in computer vision, machine learning, physical human-robot interaction, and robotic control.

I am a quick learner, highly motivated, and enjoy working in collaborative, multidisciplinary environments. I am eager to apply my technical expertise and problem-solving skills to develop innovative robotic solutions and contribute to real-world engineering challenges.

Professional Experience

2020 - Present

STEM TUTOR - FREELANCE Cantù, Como, IT

Provided tutoring in mathematics/physics/programming. reinforcing key concepts and preparing exercises.

Enhanced students' analytical skills and supported them in exam preparation.

Education

Sep 2020 - Sep 2023

Bachelor Degree: Mechanical Engineering

Politecnico di Milano.

Grade: 97/110

Sep 2023 - July 2026

Master Degree: Robotics and Mechatronics Engineering

Politecnico di Milano.

Grade: 110 with honours

Sep 2024 - Feb 2025

During the first semester of the second year of my master, I spent six month at the Aarhus University (DK) for Erasmus program.

Skills

- Human-Robot Collaboration (HRC)
- Computer Vision
- Machine Learning for Robotics
- Generative AI for Robotics
- ROS 2
- Python
- MATLAB
- Linux (Ubuntu)
- CAD: SolidWorks, CATIA, Solid Edge, Inventor
- Industrial & Collaborative Robotics
- Project Management
- Teamwork
- Analytical Thinking

Certificates

English certification: TOEIC C1
